

Concrete Formply

Plymasters Concrete Formply has a MDO (Medium Density Overlay) which gives a matte surface finish to the struck concrete and minimizes grain pattern transfer for a high-quality finish.

Here are the key differences between our four Concrete Formply panels:

Standard MLH Core

Hardwood ply with a black/brown edged MDO (Medium Density Overlay). This is the most economical Formply we supply. Standard MLH Concrete Formply can be reused 5-10 times.

 **Colour**
Dark Brown or Black phenolic film

 **Glue Bond**
(WBP)
Phenolic Glue

 **Structural Rating**
Non-Structural

 **Core**
Hardwood

Premium F14 Rated Formply

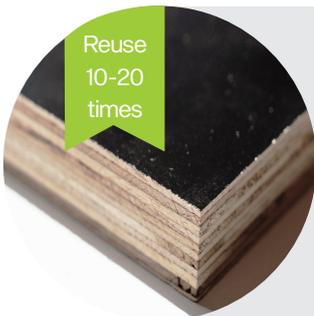

Eucalyptus core Plywood with a black/brown edged MDO (Medium Density Overlay). Premium F14 Grade Concrete Formply can be reused 10-15 times.

 **Colour**
Brown Film

 **Glue Bond**
WBP Glue
(A Bond)

 **Structural Rating**
F14 Grade

 **Core**
Eucalyptus

Euro Birch Core Concrete Formply

Euro Birch core ply with a black edged MDO (Medium Density Overlay). Birch Core Concrete Formply can be reused 10-20 times.

 **Colour**
Dark Brown or Black Phenolic Film

 **Glue Bond**
Phenol Formaldehyde
Glue, E1

 **Structural Rating**
F17 Grade

 **Core**
Euro Birch

Yellow HDO Pourform

Yellow HDO (High Density Overlay), Douglas Fir Plywood overlaid with a smooth coating. Yellow HDO Pourform Concrete Formply can be reused 15-25 times.

 **Colour**
Yellow Coloured Phenolic Film

 **Glue Bond**
(WBP)
Phenolic
Glue

 **Structural Rating**
F11-F17
Grade

 **Core**
Douglas
Fir

*It is important to discern the grade of Formply needed for a particular project and if in doubt consult your construction engineer. Suitable for residential foundations to high rise buildings and civil engineering structures such as bridges.
